Git 2.45.2 Setup

Configuring experimental options

These features are developed actively. Would you like to try them?

☐ **Enable experimental support for pseudo consoles.**

This allows running native console programs like Node or Python in a Git Bash window without using winpty, but is unfortunately not quite stable yet.

☐ **Enable experimental built-in file system monitor**

(NEW!) Automatically run a [built-in file system watcher](#), to speed up common operations such as ``git status``, ``git add``, ``git commit``, etc in worktrees containing many files.

A screenshot of a MINGW64 terminal window. The title bar at the top shows the MINGW64 logo and the path 'MINGW64:/c/Users/nadin'. The terminal content shows a series of commands and prompts. The prompt 'nadin@Nadin MINGW64 ~' is shown in green and pink. The commands are entered in white text. The first command is '\$ git config --global user.name nadinbandara'. The second command is '\$ git config --global user.email nadinwbandara@gmail.com'. The third command is '\$ git config --global user.email nadinwbandara@gmail.com'. The fourth command is '\$ git config --global user.name nadinbandara'. The fifth command is '\$ |'. The terminal has a dark background and a scrollbar on the right side.

```
